

Wealth Preservation Strategies

Your clients financial assets are subject to multiple risks and some of these can be devastating. Chief among these are the premature death of an income earner and potential medical or long term care costs. Insurance products are designed to provide protection against risk and many of these provide packaged benefits that can mitigate one or more risks. PFG's Family Asset Protection package provides lead pieces, white papers and calculators that allow you to assist your clients in identifying their potential risks and the financial impact they could have on their family. Regardless of your client's concerns regarding Wealth preservation strategies, Long Term Care alternatives or Asset replacement our easy-to-understand client presentations will present your client affordable solutions to protect against potentially catastrophic, unforeseen events.
